Objective

Work with other talented and creative individuals to bring an impactful product to market.

Experience

eTono - Founder - Los Angeles, CA (2005-Present)

Bespoke software development services

- Developed an emergency response simulation application built using React JS with deep integration into AWS Amplify. Features HLS streaming videos, Speech Generation, Stripe Integration, Cognito Authentication, GraphQL API, and Lambda Functions
- Deployed a horizontally scaling load balanced WordPress website on AWS using ELB, EC2, OpsWorks, Chef.
- Provided hosting setup, maintenance, update, backup and recovery services of Linux servers.

Velodea - Director of Development - Pasadena, CA (2008-2016)

Digital Marketing Agency

- Developed the software for the Shell Eco-marathon, an event for students to build eco-friendly vehicles. Features included multiple access roles for the various stakeholders, technical specs uploading and approval, media credentialing, staff travel, and accommodations management.
- Created a social media hub to be used for conferences and events that combines posts from various platforms into a single time based stream that is able to be archived.
- Led a small team of designers and developers on multiple projects such as iOS app development, video streaming and encoding, many API integrations, and e-commerce.
- Integral part of transitioning a design only firm into a full service digital marketing agency by adding my development skills to the team.

THQ - First Party Specialist - Calabasas, CA (2002-2005)

Video Game Publisher

- Tested over 80 video games titles on mobile, PC, Xbox, Playstation and GameCube.
- Developed network testing protocols for Microsoft Xbox Live
- Invited to work directly with developers at Pandemic Studios for the final six months developing the Full Spectrum Warrior title.

Education

Hawaii Pacific University - Honolulu, HI - B.S. Computer Science (2007)

Makana Scholarship Recipient
